

POWER ALERT 1

Stage 4 loadshedding will continue to be implemented until midnight, thereafter Stage 2 will be implemented until 05:00 on Wednesday

Tuesday, 18 October 2022: Stage 4 loadshedding will continue to be implemented until midnight, thereafter Stage 2 will be implemented until 05:00 on Wednesday. Loadshedding Stage 3 will resume at 16:00 until midnight on Wednesday and be repeated on Thursday. Stage 2 will then be implemented from 16:00 until midnight on Friday. Eskom will publish a further update on Friday afternoon, or as soon as any further significant changes occur.

Load shedding schedule for 18 – 21 October 2022
Published 18 October 2022

Date	Day	Start time	End time	Stage
18 October 2022	Tuesday	-	24:00	4
19 October 2022	Wednesday	00:00	05:00	2
		16:00	24:00	3
20 October 2022	Thursday	16:00	24:00	3
21 October 2022	Friday	16:00	24:00	2

Since yesterday morning a unit each at Duvha, Medupi as well as three units at Kendal power stations have returned to service.

A generation unit each at Arnot, Camden, Tutuka and Kusile power stations remain out of service following breakdowns in the past 24 hours.

We currently have 5 106MW on planned maintenance, while another 15 576MW of capacity is unavailable due to breakdowns.

Loadshedding is implemented only as a last resort in view of the shortage of generation capacity and the need to attend to breakdowns.
